

**L-Band Avionics Transistor**

The high power pulsed avionics transistor part number IB1011M10 is designed for L-Band avionics systems operating at 1030 and 1090 MHz. While operating in class C mode under simple mode S pulse burst conditions at  $V_{CC} = 50V$ , this common base device supplies a minimum of 10 watts of peak pulse power. It utilizes a low loss internal input impedance matching structure to yield maximum device gain and to ease the implementation of external matching circuitry. The new generation bipolar transistor geometry utilizes a gold metallization system to achieve maximum reliability. Emitter ballast resistance is incorporated on the active cell for optimum thermal distribution and maximum reliability. All devices are 100% screened for large signal RF parameters.

**Silicon Bipolar**

- Ultra-high  $f_T$

**Class C Operation**

- High Efficiency

**Common Base Configuration**

- Single Power Supply

**Gold Metal**

- Maximum Reliability

**Emitter Ballasting**

- Optimum Thermal Distribution

**Internal Impedance Matching**

- Ease of Use
- Ultra-low Loss Design

**Be0 Package**

- Unmatched Thermal Reliability

**RF Test Fixture**

- Broadband
- Matched to 50Ω
- Long-term Correlation
- 100% Device RF Screening
- No External Tuning Allowed
- Micro-strip structure on soft pc board with dielectric constant 10.2

*TYPICAL DATA    TYPICAL DATA    TYPICAL DATA    TYPICAL DATA*

Device	Freq (MHz)	$V_{CC}$ (V)	$P_{IN}$ (W)	IRL (dB)	$P_{OUT}$ (W)	$G_P$ (dB)	$I_c$ (A)	$\eta_c$ (%)	Droop (dB)

**DEFINITIONS**

<b>Data Sheet Status</b>	
Proposed Specification	This data sheet contains proposed specifications.
Preliminary Specification	This data sheet contains specifications based on preliminary measurements and data.
Product Specification	This data sheet contains final product specifications.
<b>Maximum Ratings</b>	
Stress above one or more of the maximum ratings may cause permanent damage to the device. These are maximum ratings only. Operation of the device at these or at any other conditions above those given in the characteristics sections of the specification is not implied. Exposure to maximum values for extended periods of time may affect device reliability.	

**WARNING**

<b>Product and environmental safety - toxic materials</b>
This product contains beryllium oxide. The product is entirely safe provided that the BeO base is not damaged. All persons who handle, use or dispose of this product should be aware of its nature and of the necessary safety precautions. After use, dispose of as chemical or special waste according to the regulations applying at the location of the user. It must never be thrown out with general or domestic waste.
